

A combination of Late Perennial and Ryegrass™ Grasses for longer term dual purpose use

A grass mixture aimed at producing excellent yields of high-quality forage where climatic and soil conditions are at their most challenging. Extreme dual purpose mixture is designed to cope with whatever mother nature throws at it from drought to flood

Ratings

- Deep rooting Ryegrass Plus™ Grasses tolerate drought and high temperatures
- Good yields at first cut with quick recovery
- Excellent clovers to enhance palatability and quality
- Will stand out in dry summers
- Responds well to spring fertiliser input
- Superb spring growth
- No clover option available
