

Jupiter is a very leafy turnip that can be sown in spring or autumn for forage production these leafy turnips can be grazed after just 6-8 weeks.

Jupiter also has a very high dry matter yield.

## Ratings

<b>Dry Matter Yield</b>	<div style="width: 80%; background-color: green; height: 10px;"></div>
<b>Crude Protein</b>	<div style="width: 85%; background-color: green; height: 10px;"></div>
<b>Digestibility</b>	<div style="width: 75%; background-color: green; height: 10px;"></div>
<b>Metabolisable Energy</b>	<div style="width: 75%; background-color: green; height: 10px;"></div>
<b>Bulb Size</b>	<div style="width: 20%; background-color: green; height: 10px;"></div>
<b>Bolting Resistance</b>	<div style="width: 65%; background-color: green; height: 10px;"></div>
<b>Winter Hardiness</b>	<div style="width: 70%; background-color: green; height: 10px;"></div>

Seed Rate	Pack Size	S
5 - 7.5kg/ha	10 & 25kg	U

Stock should be introduced gradually over a two week period and an area of grassland should be available for animals to return to; water and hay or straw should also be made available. Please contact your supplier for further guidance.
