

Early maturing

Kenmore is an early maturing variety with medium dry matter, best suited as stock feed not culinary use.

It has good winter hardiness which means it has a very wide utilisation window. Kenmore has bronze skin with white flesh.

Pack Size	Treatment	
Graded Seed	0.5kg	Untreated

Stock should be introduced gradually over a two week period and an area of grassland should be available for animals to return to; water and hay or straw should also be made available. Please contact your supplier for further guidance.
