

Gain Higher Yields Faster

- High early vigour
- Excellent starch
- Strong DM yield

Ratings

Strong DM yield in its segment – (98%)

Ideal for late drilling on favourable sites, providing a great early feed out option

Excellent starch (35.5%) and ME content (11.58 MJ/Kg) boost ration performance

High early vigour (7.2)

Suited to both heavy and light land

Our earliest variety recommended for biogas production - increases harvest date flexibility
