Sowing rate:	10-20g/m ²
Overseeding:	10g/m ²
Mowing height:	as necessary or twice/yr

The above mixture is ideally suited for road verges where the soil may not be of the best quality and where quick establishment, short growth, and some salt and exhaust fume tolerance are called for. 4turf® perennial ryegrass ensures fast establishment, improved drought tolerance and nitrogen efficiency. Improved stability thanks to the deeper rooted growth habit, 4turf® perennial ryegrass provides the perfect nurse crop. The inclusion of Samanta slender creeping red fescue increases the mixtures tolerance to salinity.
