Metabolisable Energy

Winter Hardiness

The forage rape element of this mixture ensures quick establishment and high protein yields, whilst the stubble turnips provide energy and stockholding capacity.

The mixture is ideal for fattening stock and will provide grazing from July through to December.

Sow mid April - mid September

Seed Rate	Pack Size	S
6 - 8.5kg/ha	10kg	U

Stock should be introduced gradually over a two week period and an area of grassland should be available for animals to return to; water and hay or straw should also be made available. Please contact your supplier for further guidance.
