

Mixtures of finer grass species with wild flowers to create floristically enhanced buffer strips

Ratings

EFA Buffer Strips

Buffer Strips

Field Corners

The addition of species rich wild flowers to species rich grass margins creates floristically enhanced field margins which provide cover for wider range of species of nesting birds, insects and small mammals

- Suitable for all soil types.
- Ideal for buffer strips and field corners.
- No Cocksfoot or Timothy.

Species Rich Grass is available as a mixture of grasses and Species Rich Wild Flowers in the following ratios:
